

## ALUMINIZED BITUMINOUS EPOXY ENAMEL

Name: VYNIL BITUMINOSA COLGOM COAT  
Code: 999.00565  
Color: ALUMINUM, SIMILAR TO RAL 9006  
Appearance: SATIN  
Packaging: KG 25 TIN  
Availability: ON REQUEST

Specific thinner: [SYNTETHIC](#)  
Name: SYNTETHIC DILUENT  
Code: 800.93405

### WHERE TO USE

Waterproofing enamel, with bituminous layers, made for painting flat and curved cover. The aluminum reflective effect no leafing reduces the absorption of solar radiations favoring the lowering of the roof covering temperature, in addition to guaranteeing a longer duration of the covering itself.

### CHEMICAL AND PHYSICAL CHARACTERISTICS

#### Referred to the undiluted one-component product

The physical constants are indicative and subject to normal production tolerances in accordance with ISO 3534-1.

Calculated specific weight	Kg/L $0.990 \pm 0.020$ L/Kg $1.000 \pm 0.020$
Calculated dry residue	Weight $40\% \pm 2\%$ Volume $38\% \pm 2\%$
Binder	SPECIAL BITUMENS + VINYL
C.O.V.	< 500 g/L
Calculated theoretical yield* two applications	7.3 mq/Kg 7.4 mq/L

## TECHNICAL DATA SHEET

\* The yield must be evaluated from time to time, as it is conditioned by multiple external and environmental factors that are variable during the application phase. In estimating the quantities necessary for the execution of the work, it is also necessary to consider the possible losses of material during mixing and application.

Drying	Air T° 25°C Relative humidity 70%
Dry to the touch	2 hours
Dry in depth	after 4 days
Overpainting	after 2 hours

## APPLICATION INSTRUCTIONS

### Optimal conditions for the application

Temperature not lower than 5°C, and anyway when the T° of the surface is at least above dew point.

Relative humidity not exceeding 80%.

Note: Excessive moisture or condensation during polymerization can negatively interfere with the polymerization itself and / or cause discoloration. Above or below normal conditions it may be necessary to use special application techniques and particular dilution ratios.

### How to treat the surface

The surface must be clean and perfectly dry. A suitable method must be used to remove dirt, dust, oils and other contaminants that could interfere with the adhesion of the product.

### Mode

By roller	SUITABLE
By brush	SUITABLE
By spray	NOT SUITABLE

## TECHNICAL DATA SHEET

### MIXTURE AND DILUTION

Both depend on the application method.

The use of a diluent other than the specific one indicated may have a negative effect on the behavior of the coating applied, with the cancellation of guarantees also explicitly expressed and / or agreed upon.

Note: Carefully mix the product before dilution. Adding the thinner and mix again.

#### Roller application

Maximum dilution 5%, taking care to reach the required thickness.

#### Brush application

Maximum dilution 5%, taking care to reach the required thickness.

### INSTRUCTIONS FOR STORAGE

The product must be stored in accordance with national regulations. After the indicated period of time, check before use to verify the integrity of the product. Storage at high temperatures significantly reduces the period of use of the product.

3

#### Enamel

12 months from the date of production in sealed can, as long as the material is placed indoor, away from heat sources, protected from frost and anyway within the limits of 4 - 30°C and humidity 0 - 80°C.

### HEALTH AND SAFETY

To be used exclusively for the uses and conditions shown on this data sheet.

In applications it is always necessary to provide adequate room ventilation.

Do not inhale the nebulised paint. Do not eat, drink or smoke during use. Do not disperse into environment. Collect spillages. Dispose of the product / container in accordance with national regulations.

The product causes serious eye irritation. Wearing protective gloves / clothing. Protecting eyes / face. In case of contact with the skin, removing the paint with a suitable detergent, soap and water. Keep out of reach of children.

**In case of need, consulting Niguarda Hospital's venoms Center at the number 02/66101029**

For detailed information on health and safety hazards and precautions for the use of this product, always consult the Safety Data Sheet.
